Shaker Flat Panel

PRIMED DOORS

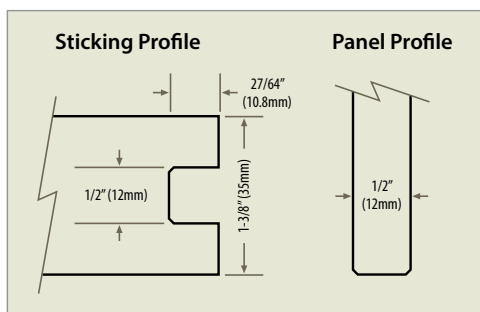

Features:

- A complete line of Shaker style doors in a broad range of panel configurations
- Environmentally friendly, FSC Certified
- 5-year limited warranty
- All doors are full and square and polyolefin wrapped

- 1 Top & bottom of door is factory-sealed for reliable performance
- 2 Shaker sticking
- 3 Superior priming – five coats with sanding between coats
- 4 Panels are primed prior to assembly

Panel edges are kerfed and squeezed during panel insertion, allowing them to expand and grip the inside door frame, eliminating rattling.

Fire – 20 Minute Flat Panel

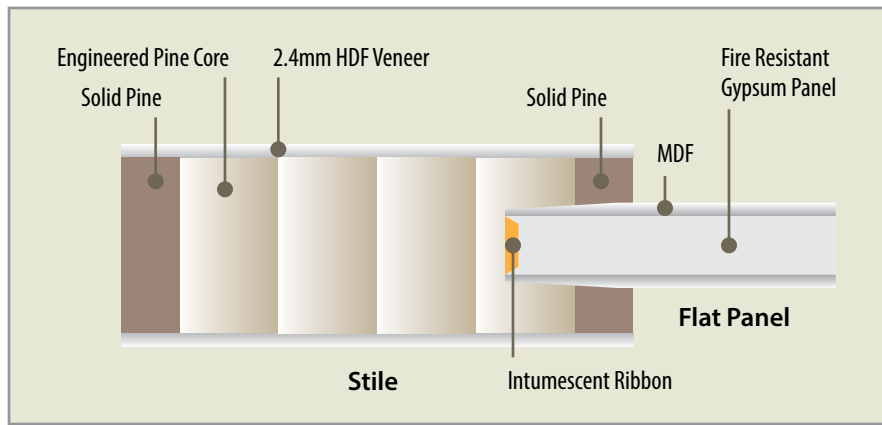

PRIMED DOORS

Features:

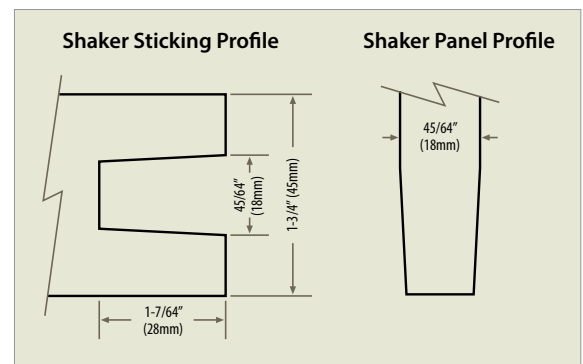

- Frameport 20 Minute Fire Door Slabs are certified through Intertek's Building Products Certification Program as compliant with UL 10C Standard for Positive Pressure Fire Tests of Door Assemblies
- Flat Panel Doors are listed with Intertek WH under Specification # 51014 – 20 Minute without Hose Stream (US only)
- All Frameport Fire Doors are constructed with fire-resistant gypsum panels & intumescent ribbon to seal joints when exposed to open flame

Intertek's Warnock Hersey (WH) Mark is North America's leading product safety and performance mark for fire doors.

- 1-3/4" thickness
- Fire doors feature shaker-style flat panels to match standard interior shaker doors, allowing consistency of design throughout the home (component dimensions may vary, see specification drawings for details)
- Per NFPA 80 Standard for Fire Doors and Other Opening Protectives, maximum trimming allowed from the bottom of the doors is 3/4"
- Frameport Fire Door Slabs can be added to existing Fire Door System certifications – consult your certifying body for instructions
- Environmentally friendly, FSC certified
- All doors are TSCA compliant
- 5-year limited warranty

About Frameport Doors

Founded in 1979, Frameport has grown to become one of the largest door manufacturers in the world. Frameport owns and manages the forest, sawmill & a state-of-the-art manufacturing facility, creating a vertically integrated operation. Bringing together precision, quality control & flexible production, Frameport offers a wide variety of door styles, sizes & finishes. Both factory and forest are certified by the Forest Stewardship Council, (FSC).

Frameport produces the best stile & rail wood doors available today. With the ever-growing demand for the high quality & aesthetic appeal of real wood doors, the homeowner will continue to look to Frameport to set the standard for value, craftsmanship & design in the door market.

Why Frameport?

The top and bottom of every slab door is factory-sealed with two coats of UV Activated polyacrylic varnish.

Stiles are manufactured with Engineered & LVL technology to eliminate warp and feature solid wood 5/8" Edge Bands for trimming & sizing.

Contoured panels provide a snug fit, preventing them from moving, yet accommodating expansion due to changes in humidity and eliminating panel shifting after finishing.

Louvers are up to 50% thicker for increased strength and no warping.
